

How to connect to UR_RC_InternalSecure from Windows 7

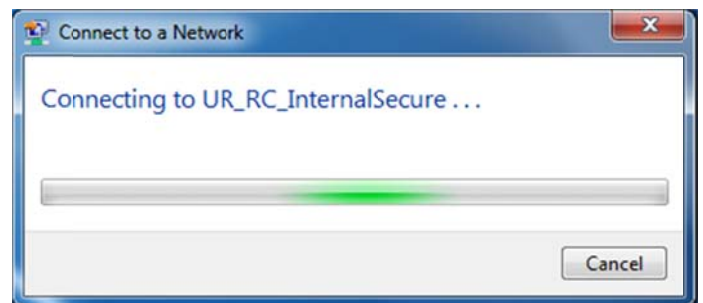

Click the Windows 7 wireless manager icon in the system tray.

Click on the **UR_RC_InternalSecure** network connection and then click **Connect**.

You will be asked to enter a Security key. Enter **URWireless** and click **OK**. You will then see a window that shows you are connecting to **UR_RC_InternalSecure**.

After the connection completes, you will be prompted to select a location for the network. Select **Public network**. If you click on the network manager again, you will see that you have now been connected to the UR_RC_InternalSecure network. Click Disconnect to disconnect from the network.

Open a web browser - you will be redirected to the URWireless Acceptable Use Policy. Enter your NetID and password on the left and then click Login.
